PORTFOLIO

sanduni2002-ksp.github.io

KNOWLEDGE AREA

Programming Languages

C, Embedded C, Java, PHP, Verilog HDL

Web Development

HTML, CSS, PHP, Web Hosting &
Deployment

Databases

MySQL, SQLite

Other

Linux, Computer Network, MATLAB
simulation and programming, Vivado,
Apache NetBeans, SolidWorks (CAD),
Photoshop

CORE SKILLS

- › Problem Solving
- › Software Development
- › Networking
- › Communication
- › Teamwork
- › Project Management

PRASHANGA PREMAWANSHA

3RD YEAR UNDERGRADUATE IN COMPUTER SYSTEM ENGINEERING

OBJECTIVE

Third-year Computer System Engineering undergraduate at NSBM Green University, seeking an internship. Interested in software development, computer networking and practical problem solving. Completed a first internship at the Sri Lanka Ports Authority, gaining hands-on experience in PHP development, system hosting and professional IT practices.

INDUSTRIAL EXPERIENCE

IT Intern

Sri Lanka Ports Authority

- Developed PHP-based systems as part of the authority's internal IT work.
- Handled web hosting and deployment tasks for the systems worked on.
- Contributed to the SLPA Intern Management System across development, hosting and deployment.
- Worked within a professional IT environment, building teamwork and communication practices.

PROJECTS

Intern Management System - SLPA

PHP | Web Hosting

- PHP-based system contributed to during the Sri Lanka Ports Authority internship.
- Involved development, hosting and deployment tasks.

Website link: https://portcom.slpa.lk/intern_manager/dashboard.php

Order Management System

Java | JavaFX | MySQL

- Desktop application built on Java/JavaFX with a MySQL database backend.
- Handles orders, inventory, payments and PDF invoice generation.

Smart Parking Management System

PHP | MySQL

- Designed and built a web application managing parking slots, reservations, vehicles, and payments, gaining hands-on experience in database management and software development.

Smart Parking Guidance System

Arduino Uno | ESP8266 Wi-Fi | Ultrasonic Sensors | Embedded C

- Real-time vehicle guidance prototype using ultrasonic sensing for slot detection.
- Built on Arduino Uno with an ESP8266 Wi-Fi module, programmed in Embedded C.

FPGA-Based Two-Player Reaction Game

Verilog HDL | Xilinx Vivado | FPGA Development Board

- Two-player reaction-time game implemented in Verilog HDL on an FPGA development board.
- Covers input debouncing, controlled start timing, reaction detection and winner indication using push buttons and LEDs.

PROJECTS (CONTINUED)

DC Dual Voltage Power Supply

Voltage Regulators | Transformer | Bridge Rectifier | PCB Soldering

- Designed and assembled a regulated dual-output power supply.
- Covered transformer selection, bridge rectification, voltage regulation and PCB soldering.

EDUCATION

BSc Engineering (Hons) in Computer System Engineering

2023 - Present

NSBM Green University

- Third-year Undergraduate | GPA: 3.5

G.C.E. Advanced Level - Mathematics Stream

2019 - 2023

Rahula National School, Godakawela

- Passed with B, C and S grades.

G.C.E. Ordinary Level

2018

Rahula National School, Godakawela

- Mathematics - B | Science - B

SOFTWARE AND WEB TECHNOLOGIES

- Computer networking
- Software development
- Embedded systems
- Practical problem solving

CERTIFICATION

Introduction to Linux (LFS101)

The Linux Foundation / September 2026

- Successfully completed the Linux Foundation’s Introduction to Linux course.
- Certificate ID – **LF-jsvs0y7jqb**

Computer Fundamentals & PC Applications Course

Computer Resource Centre – Embilipitiya Zone | 2019 | 80 Hours

- Completed practical training in computer fundamentals and PC applications.

Microsoft Office Applications Course

Computer Resource Centre – Embilipitiya Zone | 2022

- Completed practical training in Microsoft Word, Excel and PowerPoint.

OTHER QULIFICATIONS

- Represented the university as a member of the Chess Team.
- Developed strong teamwork, problem-solving, and technical skills through active involvement in university clubs and societies.
